PERFECTLY ENGINEERED

Wood is perfectly crafted by nature. Col has taken this one step further by engineering the timber to create products that are both sustainable and beautiful in your home.

Col products are laminated with waterproof adhesive to improve strength and stability. Finger-joints allow for longer lengths of clear timber, help to minimise lateral movement and ensure the timber retains its natural beauty over time.

SUSTAINABLE RESOURCE

Timber is a sustainable and renewable resource. The more wood we use, the more forests we grow. Not only does wood bring warmth into your home, it's also the best choice for the environment.

PINE

Our pine is sourced from local plantations that are FSC®-certified. FSC® certification ensures that products come from well-managed forests that provide environmental, social and economic benefits in line with our Forests For All Forever® vision of preserving the world's forests for future generations.

The mark of
responsible forestry

HARDWOOD

Our hardwood is sourced from sawmills around the world, where Governments in these regions have implemented strict sustainability policies and compulsory harvesting programmes. These policies protect the environment and forest ecosystems as well as the interests of local communities.

CUT A TREE - PLANT A TREE

MOULDINGS

Create a sense of grandeur or simply add a decorative touch to your home with our wide selection of hardwood and pine mouldings, cornices, architraves and plinth blocks.

OLD CAPE MOULDINGS

Also known as Victorian mouldings, these classic profiles are available in 3m and 3,6m lengths in SA pine or imported hardwood.

We can also custom-make special profiles to suit your design. Ask your merchant to contact us with specific requirements.

STANDARD MOULDINGS

These popular mouldings are made from either SA pine or imported hardwood. A wide selection of quality mouldings is available. Ask your merchant to contact us with specific requirements.

A wide selection of the finest Old Cape Mouldings, offering both modern and traditional designs.

PAR TIMBER

The secret to durable PAR timber is in the drying.
Not all PAR timber available on the market is the same.

We kiln-dry our timber to an optimal moisture content, which keeps the wood in balance with atmospheric conditions, thereby stabilising the timber and minimising natural movement.

Selected PAR Timber is laminated to improve strength and stability, providing lengths of timber par excellence.

Available in SA pine or hardwood.

HARDWOOD & PINE								
PAR FINISHED SIZE - AFTER PLANING

EXPAND-A-SHELF®

EXPAND-A-SHELF® is a DIY modular shelving system that allows you to create your own storage or display solution.

It's a versatile, flexible, easy-to-assemble solution, and is available in a variety of lengths and widths to suit your needs.

Sturdy uprights are constructed of quality raw pine. Components are pre-drilled and screws are supplied – all you need is a screwdriver.

Assembly instructions are included with your purchase.

EXPAND-A-SHELF® SPECIFICATIONS

Shelves (Length x Width)	Upright Heights
600mm x 255mm	450mm (holding 2 shelves)
900mm x 255mm	840mm (holding 3 shelves)
600mm x 340mm	1200mm (holding 4 shelves)
900mm x 340mm	1500mm (holding 5 shelves)
400mm x 340mm	1800mm (holding 6 shelves)
new Value pack	450(h) x 400(w) – 2 shelves
Value pack	450(h) x 1200(w) – 3 shelves
Value pack	1200(h) x 600(w) – 4 shelves
Value pack	1800(h) x 900(w) – 4 shelves

1 Place back uprights flat on the floor. Space according to shelf widths. Ensure the ends marked "bottom" are aligned.

2 Working from left to right, fit shelves into grooves in the uprights. Remember that centre uprights form a common rest for two shelves.

3 Fit the front uprights onto the shelves. Ensure that all shelves and uprights are correctly aligned before securing through pilot holes with screws provided. You may find it easier to drill or knock pilot holes into the shelves.

4 When all screws have been secured on one side, turn unit over and repeat the procedure on the other side. Stand unit upright and admire your handiwork!

WORKBENCH

Equally at home in an upmarket country kitchen or a contemporary bathroom, these sturdy workbenches can be painted or stained to suit your decor.

Available in five ready-to-assemble sizes.
Add castors for mobility and flexibility.

WORKBENCH SPECIFICATIONS

Code	Description	Size (mm)
TPO.6WBKD	900H Pine Workbench	600(W) x 600(L)
TPO.9WBKD	900H Pine Workbench	600(W) x 900(L)

POLYSTYRENE CORNICES

This range offers different styles, available immediately and accompanied by the great service our clients have come to expect.

The range is available in sturdy dispensing boxes. Both the box and the individual units are barcoded for ease of sale.

Made from CFC-free XPS material, Col Polystyrene Cornices are lightweight and easy to install and paint.

Also available to our retail partners is a modular point-of-sale dispensing solution, which is easy to install, and will benefit your store regardless of the size.

FOR THE PERFECT FINISH

SWARTLAND

The Swartland story began back in 1951 with Oupa Hanekom in the small town of Moorreesburg - a few wheat fields north of Cape Town.

When his son, Oom Jurgens, took over the reins, he introduced his personal philosophy of “continuous improvement” to the business.

Today under the leadership of Jurie, James and Hans Hanekom, this desire to improve constantly is an integral part of the Swartland culture. It's a place where traditional values such as hard work and pride live in harmony with new technology and inspired ideas.

The results speak for themselves: our products are crafted to perfection, manufactured to last and backed by knowledgeable national sales and service teams.
